

# THE LIVESAY FAMILY

Hello, my name is Kristin Livesay, and I have been living in Delaware for nine years. I am a single mother of a ten-year-old boy and a two-year-old girl. As a family, we enjoy swimming, playing video games, and walking our dogs at the park. Presently, we reside in an unhealthy rental property that has caused economic hardships in my life. Our living condition has not only brought overwhelming stress, but due to the mold in the home, it has caused my two-year-old daughter to suffer numerous asthma attacks. Thankfully, Habitat has stepped in to help change our living condition. Because of this amazing experience, I can have peace now. As I become a homeowner, I look forward to sharing pleasant memories and continuing a better path for my children!
